Re: Docket #MB 04-232

Dear Ms. Dortch:

As an owner of a classical radio station, I feel I am getting penalized because of other formats that have created concern in the area of indecency. As you might imagine, we have NO situation that would create a hint of unacceptable programming. We play classical music 24 hours a day, seven days a week. We have commercial spots that are applicable to our stations format and provide public service announcements for our community. In addition, I would have to purchase and install new equipment for recording our programming each day which would cost us at least \$1500.00. Therefore, in considering your new proposal, you must consider the financial constraints that small stations like ours would have as well.

Please reconsider and think of what you would be putting many stations through for what only a few that created the problems.

Sincerely,

Sherrie McCullough
President
